

# Product Sheet

## Survivor

### INTRODUCTION

Survivor Alfalfa is a persistent variety with high yield potential. It has a deeper set crown than most conventional alfalfas. This deep-set crown is helpful in providing additional protection insulating the crown in adverse winters and where wheel and animal traffic is very damaging to the crowns.

FEATURES	
Crown Setting	Deep
Winterhardiness	1.5
Fall Dormancy	3.0
Regrowth	Good
Root Type	Tap
Disease Resistance Index	26
Phytophthora Root Rot	HR
Bacterial Wilt	HR
