

Product Sheet

Perennial Ryegrass

Description:

Passport turf type perennial ryegrass gives you entry to a new world of turf performance and disease resistance to crown rust, leaf spot, and brown patch, and red thread. Establishes quickly and has a good colour with high density and good turf performance. Passport, is well suited for golf courses, athletic fields, parks, and home lawns. An excellent choice for overseeding in southern regions.

Excellent Overall Turf Quality:

- Early establishment
- Distinct summer density
- Versatile application
- New genetics, new disease resistance
- Applicable for cooler season zones

Seeding	
Rates	Use 8-1lbs/1000 sq ft. in most applications. For low maintenance areas, seed at 3-5lbs/acre.
Establishments	Passport establishes quickly in bare soils, allow 5-7 days to germinate with favourable conditions. Passport performs well in bluegrass, fine fescue mixtures.
