

# Product Sheet

## PLAYER Perennial Ryegrass

Player Perennial Ryegrass

### Introduction

Player Perennial Ryegrass is specially bred to produce superior growth and development and withstand many of the diseases that affect perennial ryegrass when grown under hot, humid conditions. Used as dark permanent turf in cool season zones and to facilitate better spring transition to Bermudagrass in overseeding on southern golf greens, tees, fairways and lawns. It is also a proven performer for parks and athletic facilities. It can be used as a blend or as a stand alone variety.

### Important Features

- Fine texture with dark green colour
- Establishes quickly
- Performs well in most soils
- Excellent heat and drought resistance
- Disease resistant
- Ideal for high traffic areas

### Important Benefits

- Attractive appearance
- Requires less fungicide
- Delivers optimum summer performance
- Improved mowability
- Reduced plant stress
- Smooth spring transition
- Maintains colour (fade resistance)
- Reduced leaf shred
