

Product Sheet

Wetland Brand

Introduction:

Wetland Brand is a new variety from the WET Trait line-up. Wetland Brand tolerates soils that remain wet for extended periods of time. It has branched, floating roots that keep the majority of the roots above fluctuating water tables. University research shows that branch rooted alfalfas perform better in heavy ground than tap rooted cultivars. This variety possesses excellent winter hardiness and displays a disease resistance package unsurpassed in the alfalfa seed industry. These strong traits result in extended persistence of the stand, increased yield and improved overall performance.

FEATURES	
Maturity	Medium
Winterhardiness	1.9
Fall Dormancy	3.0
Regrowth	Excellent
Root Type	Tap/Branch
Disease Resistance Index	27
Phytophthora Root Rot	HR
Bacterial Wilt	HR
Fusarium Wilt	HR
Verticillium Wilt	R

Wetland Brand offers a solution to producers looking for an alfalfa variety that will perform on soils with a high water table or soils with a shallow hardpan. It also offers excellent yield potential with unsurpassed regrowth. With strong winter hardiness and a second to none disease package, this variety is a great fit for any field. Wetland Brand mixes well with timothy, orchardgrass, brome grass and other grasses to meet specific area needs.

A photograph of a rural landscape featuring a field of green alfalfa with several round hay bales scattered across it. In the foreground on the right, there is a large, rectangular stack of hay. The sky is clear and blue.
