Isis RR

Roundup Ready® Soybean

BrettYoung is pleased to offer Elite Soybean varieties for Western Canada. The varieties are from Elite's own breeding program. Elite is a leader in the development of early soybean varieties. These varieties have been tested and grown in Manitoba and have been found to be well adapted to our growing conditions and show the real potential of expanding our soybean production area.

Isis RR is a new short season variety. Early 2400 CHU. Top yield in short season group in 2007 trials.

- Hilium: Brown
- 2400 CHU
- Relative Maturity 000.8
- Yield for Maturity 9
- Standability 9
- Vigour 9
- Sclerotinia Resistance 7

Monsanto Company is a member of Excellence Through Stewardship (ETS). This product has been commercialized in compliance with the ETS Product Launch Stewardship Guidance and the Monsanto Product Launch Stewardship policy, after meeting applicable regulatory requirements in key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® agricultural herbicides. Roundup® agricultural herbicides will kill crops that are not tolerant to glyphosate.
