

# AMBASSADOR

CHEWINGS FESCUE

## Product Information Sheet

**Ambassador Chewings fescue** is an elite fine fescue variety known for its dark color, fine leaf texture, good mowing qualities, disease resistance, and insect resistance. It is 100% endophyte enhanced. Ambassador ranked #1 for Dollar Spot resistance of Chewings Fescue Cultivars in the 2005 NTEP trials. It also ranked high for genetic color, shade tolerance, and traffic tolerance.

Ambassador is ideally combined with bluegrass, perennial ryegrass, and other fine fescues in cool season mixtures requiring shade tolerance. It is an ideal selection for sod production mixtures, high quality low cut tennis or croquet courts, lower maintenance areas, and golf course roughs where the “Links look” is desired. Its fine texture and traffic tolerance also make it a good choice for overseeding dormant bermudagrass in combination with perennial ryegrass.

### Characteristics

- Dark green genetic color
- Very fine leaf texture
- Very good mowing qualities
- Excellent disease resistance
- Ranked #1 for dollar spot in 2005 NTEP
- Ranked #1 for traffic stress in Madison, WI in 2005 NTEP
- Excellent summer density ratings
- Good cold tolerance
- Drought and heat tolerant
