One of the first entirely new Kentucky Bluegrass hybrids of the new millennium, Boutique promises to raise the bar for proprietary Kentucky Bluegrasses. It's fast emergence and quick establishment will make it a natural choice for any professional turfgrass user.

Boutique is an elite, Category One Kentucky Bluegrass which produces superior turf under both low and high management regimes. Boutique maintained its color and density under extreme heat and humidity better than did most of the popular bluegrasses sold in the market today.

Boutique (A96-328) produces a high tiller density and thrives at mowing heights between 1/2 to 2 inches. It is compatible with other darker green, lower growing Kentucky Bluegrasses and is the ideal candidate for discerning sod growers who can command the highest premium for high quality Kentucky Bluegrass sod.

Its disease resistance and dark blue green color promises to make Boutique the most popular new variety of Kentucky Bluegrass in a long time!
