

EXECUTIVE BLEND KENTUCKY BLUEGRASS

Description:

Executive Blend Kentucky Bluegrass is:

- the result of years of testing and selection for top rated turf attributes like disease, density, dwarf growth habit, dark colour and traffic tolerance.
- the ultimate seed blend for the sod market. Stunning color and cutting edge blending technology makes for an irresistible sod product for sports fields, elite golf courses as well as home lawns.

Characteristics:

- Executive Blend Kentucky Bluegrass is specially designed to yield a naturally darker turf. Simply put, for home applications this elite seed blend means darker dense green with less fertilizing.
- Executive Blend's extreme density will help compete with weeds and provide that ultimate turf demanded by both the turf professional and most demanding home owner, plus it will green-up quickly in the spring.
- Executive Blend provides less vertical growth and a lower canopy height. This means less mowing and lower growing turf.

Uses:

- Executive Blend is an excellent choice for all Kentucky Bluegrass applications, including home lawns, parks, commercial turf, recreational areas, sports turf and elite golf course applications.
