

Grid-Lock Greens Covers protect turf from wind, moisture, animals, snow & frost. An excellent tool to aid in greens maintenance. Made of tough woven polyethylene material. Webbing around perimeter for easy staking. Webbing allows stronger staking capabilities, superior tear resistance and containment.

STAPLES (COATED)

Product Code NPN

Designed to hold down impermeable turf covers and coated for rust protection and visibility, these 6" rust resistant staples are of the highest quality and strength, resembling sod staples.

1.7 oz Un-Coated Polyethylene

Built in the industry standard of 1.7 oz, this cover provides protection against crown hydration and desiccation. It allows water to pass through the weave for those areas that have the requirement for water to move through. This cover works also very well as a green-up cover in the spring and a germination cover. Standard sizes - 60ft. x 90ft. & 75ft. x 110ft. Custom sizes available. Color - Green.

3.0 oz Un-Coated Polyethylene

This ultra durable 3.0 oz cover is longer lasting than the 1.7 oz with an estimated life expectancy of 5 years depending upon handling, climate and storage conditions. Like the 1.7 oz cover this allows limited water to pass through the weave and because of its added weight provides additional protection from crown hydration and desiccation. Standard Sizes - 60ft. x 90ft. & 75ft. x 110ft. Custom sizes available. Color - White.

3.5 oz Coated Polyethylene

This heavy duty cover is more durable and moisture resistant than the 1.7 or 3.0 oz covers. The coated fabric provides the ultimate in protection from crown hydration and desiccation. The coated 3.5 oz material does not allow moisture to move through the fabric. The life expectancy of this cover is 7 years, while the coating is 3, dependant on handling, storage and climatic conditions. Standard Sizes - 60ft. x 90ft. & 75ft. x 110ft. Custom sizes available. Color - White.
