

Passport Perennial Ryegrass

Description:

Passport turf type perennial ryegrass gives you entry to a new world of turf performance and disease resistance to crown rust, leaf spot, and brown patch and red thread. Establishes quickly and has a good colour with high density and overall excellent turf performance.

Characteristics:

- Early establishment
- Distinct summer density
- Versatile application
- Great disease resistance
- Applicable for cooler season zones

Use 8 - 10 lbs / 1000 sq ft in most applications.

Passport establishes quickly in bare soils, allow 5 - 7 days to germinate with favorable conditions. Passport performs well in blue grass, fine fescue mixtures.

Uses:

Passport is well suited for golf courses, athletic fields, parks and home lawns. An excellent choice for overseeding.
