

PENN A-1 CREEPING BENTGRASS

- Very dark green color
- Outstanding heat and cold tolerance
- Superior wear tolerance
- Good winter color
- Quick Spring green-up

Oregon's most experienced growers produce Penn A-1 to standards higher than general certified standards.

These are:

Pure Seed	98%	minimum
Other Crop	0.04%	maximum
Weed Seed	0.03%	maximum
Inert Matter	2.00%	maximum
Germination	85%	minimum

Free of *Poa annua*, *Poa trivialis*, and all other noxious and objectionable weed seeds.

Penn A-1 has a very dark green coloration, fine leaf texture, tremendous heat and cold tolerance, very high density, and superior disease resistance. It has very good winter color and spring green-up. It provides a superb putting surface and will provide an excellent playing surface on tees and fairways too.

Recommended seeding rate 1.25 to 1.50 lbs/1,000 sq ft for new plantings and 0.1 to 0.25 lbs/1,000 sq ft for interseeding. It has proven adaptable to various growing conditions and management practices. There is University data showing that

Penn A-1 is able to compete against weeds such as *Poa annua* with great success. Prefers to be kept on the dry and lean side, reducing maintenance expenses.
