

Southern Golf Flags-the world's finest. Skilled craftspeople turn raw bolts of long-lasting Solarmax nylon into flags you'll be proud to fly on your course. We offer a wide selection of sizes, colors, fabric weights and designs, including embroidered and screen printed flags.

Our flags require up to 16 painstaking steps to complete, and include built-in features like a ribbed, warp-resistant tube to prevent bowing, an ultraviolet protection to resist sunlight fading and extend flag life. We sew with extra heavy thread and lots of stitches to stand up to heavy wind conditions. We do not use any glue or staples in our manufacturing process. Our flags are available in 400-denier fabric-the strongest & longest lasting on the market-or 200-denier.

You can choose from three mounting systems for any flag:

- 1 Standard plastic tube
- 2 Soft tube (uniquely quiet)
- 3 3-hole grommet strip

Whether you chose standard flags or prefer custom designs made just for you, you'll find Southern Golf Flags help your course put its best food forward with players.

Solid Color Flags

Available in 7"x10", 14"x20", 18"x25"

These Solarmax nylon flags meet all known tournament specifications and are beautiful when seen from either side. The fabric itself is UV treated and resists sun, weather and fading without heavy coatings.

Check Flags

Available in 7"x10", 14"x20", 18"x25"

Our check-pattern flags start with the same durable nylon fabric as our solid-color flags. The individual, hand sewn pieces are then assembled using 16 painstaking steps. We even reinforce each seam with extra bar tacking stitching, so the finished flags stand up to wind, weather and a year of use on your course.

Custom Flags

Available in 7"x10", 14"x20", 18"x25"

Your logo/art beautifully executed in embroidery or screen print, on the flag of your choice, for a flag that stands out.
