

# Spreaders

**Lesco Drop Spreader** #092474

When the application requires sharply defined edges or low ground clearance, rely on the precision accuracy of the Lesco Drop Spreader, with two interchangeable hopper buttons, it's the king of versatility. 36" spreading width for precise application control. Steel, three bar rotor delivers optimum product agitation.

**Lesco Spreader** # 091186

Hi-Wheel Stainless Steel Spreader High wheel design adds to the maneuverability. Features tough, stainless steel frame, durable polyethylene hopper and labor-saving, 80 lb capacity. Rate adjustment mechanism helps provide precise flow control. The industry standard across North America.

**Spreader Caddy**

An easy way to transport your commercial fertilizer spreader. No more lifting, straining, fertilizer spills, spreader damage by dropping... a real worksaver Fits "both" Lesco & Scott's spreaders.

**5-Bushel Pull Behind Spreader/Trail Feeder ATVS**

With its 5-bushel (300 lbs) capacity this can be easily towed by just about anything. All steel gear drive, 20 ft. spread, solid steel hopper, wheel driven, pneumatic tires.

**PrizeLAWN ProClassic 36® drop spreader**

This quality professional use drop spreader is a full 36" wide, designed for precision application and easy operation.

Features include:

- A redesigned handle that is ergonomically designed to reduce operator fatigue
- 13" diameter wheels make it easier to push
- Dual, shielded agitation to reduce operator load resistance
- Agitator bar designed to prevent premature product breakdown
- Stainless steel fasteners
- Heavy gauge, 100 lb. capacity hopper with precision welded construction
- A longer, heavy duty handle
- Longer highly visible, easy set rate adjustment
- Positive on/off lever with locking pin, durable epoxy coated steel hopper.

**Truckster Electric Rotary Spreader**

#720756

Designed to be mounted on the back of a truckster-type vehicle, this convenient rotary takes the push out of product application. Mounts on turf maintenance vehicles with 12 volt electrical system for less labor-intensive product application. 80-lb capacity hopper on black epoxy frame is ideal for most applications. Complete with motor, wires and on/off switch for convenient installation.

**TRAM (COSMO) Fertilizer Spreader**  
**Product Code PTB560**

The PTB560 features single piece construction for added strength and durability, accurate metering, works with a clevis or ball hitch, a low centre of gravity for easy loading and application on slopes, 450 litre hopper (13.2 bu) that holds 1,561 lbs.

**Ornamental Root Feeder** #013873

Provides efficient injection of fertilizers and pesticides into the root zone of trees and ornamentals.

**Flexible Drag Mat**

**Product Code** 005364 ( 6'W x 5'L)

Ideal for topdressing and overseeding, this economical flexible steel mat is stocked in the 6' wide x 5 ft' long configuration. Additional sizes available upon request.

**DST Spiker Seeder** Product Code DST-S

The DST Spiker Seeder works similar to a drop seeder, with the added benefits of aerating tines that penetrate the turf at a 1 1/2 to 2 inch depth. There are 21 tines spaced 2 inches apart, operating individually on an axle therefore making the DST Spiker Seeder very maneuverable on fine turf areas.

**DST Turf De-Thatcher**  
**Product Code DST-TD**

An ideal tool for removing thatch, snow mold residue and aerating all in one quick and easy step. The De-Thatcher has 48 spring tooth tines. The tines sit at a 90 degree angle at rest and span 118 inches in width.
