

Adrenalin is a synthetic variety comprised of elite trial plants selected for high forage quality, persistence and high yield. With a multi-foliolate expression ratio, Adrenalin meets demand for a high quality fine leaved alfalfa variety. Adrenalin is adapted to 3, 4 and aggressive 5 cut harvest systems and is wheel traffic tested.

## Performance in Trials

## Key Characteristics

- High forage yield
- Dairy quality hay
- Excellent stand persistent
- Broad disease and insect resistances
- High multi-foliolate expression

Agronomic Traits	
Trait	Rating
Bacterial Wilt	HR
Fusarium Wilt	HR
Phytophthora Root Rot	HR
Verticillium Wilt	HR
Anthracnose Race 1	HR
Aphanomyces Root Rot (Race 1)	HR

Winter Survival and Adaptation	
Fall Dormancy	4.0
Winter Survival	2.0
Stand Persistence	Excellent
DRI	30
