

PERENNIAL RYEGRASS

Turf Quality

iQ is a strong performer in overall turf quality. In particular, it is characterized with a strong color, which contributes to its strong performance in a turf application or in a blend with other perennial ryegrasses.

High Endophyte

Enhanced with 70% endophyte, which provides resistance to a number of leaf crown feeding pests.

Gray Leaf Spot Resistance

iQ is an elite generation perennial ryegrass with enhanced gray leaf spot resistance. The strong disease resistance of iQ is strengthened further by excellent red thread resistance. iQ will shine through in the heat of summer.

Dark Green Color

Demanding turf professionals will be pleased with the dark green color exhibited by iQ. iQ is a leader in NTEP genetic color ratings.
