

A New Deputy in Town

Deputy is an eco-friendly tall fescue that exhibits a unique combination of traits coupled with high endophyte levels that allow it to provide excellent turf quality through rigorous conditions. Deputy also has high salt tolerance.

Reduced Maintenance

Deputy presents an exciting opportunity for reduced maintenance in residential and industrial applications. Deputy's unique regrowth characteristics can lead to less mowing and provide valuable time savings to the landscape professional. Deputy is consistently among the very best varieties for reduced regrowth.

Brown Patch Resistance

Deputy lays down the law on brown patch, with exceptional resistance levels that are consistent with BrettYoung's commitment to an industry leading brown patch resistant tall fescue lineup.

Drought Tolerance

To further build on Deputy's low maintenance benefit, Deputy will also provide you with the ability to maintain higher green cover ratings through periods of drought.

Turf Quality

The combination of excellent turf quality and strong performance in tough conditions makes Deputy an outstanding choice for a leading turf type tall fescue.
