

# ALFALFA

## Blend 4440

### The Premier Certified Alfalfa Blend for the Canadian Prairies

Blend 4440 is a mixture of premium, certified alfalfas specifically developed to combine the strengths of our best varieties: high yields, superior winterhardiness, salt tolerance, multifoliolate expression, and unique rooting habits such as branch root, sunken crown and creeping root characteristics. The unique strengths of this blend offer suitability to a wide range of growing conditions. Demand the best, insist on BLEND 4440 ALFALFA.

FEATURE	DESCRIPTION
<b>Branch Root</b>	Root system that is up to 80% branched for optimum performance in poorly drained soils.
<b>Sunken Crown</b>	Deeper set crown that protects from harsh winters, heavy machinery and animal traffic.
<b>Salt Tolerant Tap Root</b>	Salt tolerant tap root that is more persistent in salinity, plus an outstanding disease package and high yields.
<b>Multifoliolate</b>	High multifoliolate expression resulting in higher, softer leaved feed value.
<b>Creeping Root</b>	Strong dormancy with exceptional winterhardiness and improved disease resistance. Prostrate growth habit tends to fill-in bare ground.

### Key Features

**Certified alfalfa blend**

**Premium varieties**

**Widely adapted**

**Persistent in adverse conditions**

**High yield potential**

**Excellent winter hardiness**
