

BROOKLAWN

KENTUCKY BLUEGRASS

A top-performing variety, matched with excellent value, there's a reason Brooklawn is requested time and again for blends. This compact Shamrock type has dark green colour, fast spring green-up and excellent disease resistance. Rapid establishment and aggressive rhizome development make Brooklawn an excellent choice in blends and sod farms. High tensile strength greatly increases wear tolerance and lift-ability. It's resistance to powdery mildew and crown rust make Brooklawn ideal for blending with other improved Kentucky Bluegrass varieties to enhance quality.

Turf Quality, National Turf Evaluation Program

	TURF QUALITY RATING*
Brooklawn	5.9
Moon Shadow	6.6
Nuglade	5.9
Moonlight	5.8
LSD	0.4

Overall Turf Quality
