

Forage Oat

High Performance Forage Oat

Description

Haywire was selected for its superior forage production. Haywire's large leaf provides growers with an abundant return of exceptionally high quality feed in both silage and hay applications. It is suitable for hay, silage and cover crop applications. For maximum returns harvest should occur in early dough stage.

Haywire a Great Combination of Yield and Quality

Data taken from 2014 Trial in Pennsylvania, US

Features

Superior forage return

Superior forage quality

Fast establishment

Excellent standability
