

# STOCKADE

## Forage Peas

### Stock-Up on Quality Forage

#### Description

Chosen for its smaller seed size and more vines per plant, Stockade Peas give Growers significantly more pea plants per acre with increased biomass. Stockade has been selected for high protein and sugar content delivering outstanding feed value. The result is higher quality forage and better milk production. Stockade Peas have strong spring vigor making them ideal to use for establishing forages such as alfalfa.

#### Features

Strong vigor

Small seed

More vines

High protein and sugar

Improved disease resistance
